SUMMARY

Highly motivated individual with a good understanding of software development principles, algorithm design, OOP and programming languages. Seeking an opportunity to leverage this knowledge to learn, apply practical solutions, and contribute to real-world projects.

PROJECTS

OCR WEB APPLICATION WITH FLASK

- Developed a Python Flask project with Easy-OCR for optical character recognition. Users upload images, select languages, and receive text output.

Technologies: *Python, Flask framework, Easy-OCR, HTML5, CSS3*

DJANGO BLOG WEB APPLICATION

- Programmed a dynamic blog app enabling user registration, login/logout, and seamless blog management with formatting, editing, and deletion features.

Technologies: *Python, Django Framework, HTML5, CSS3*

SENTIMENT ANALYSIS WEB APPLICATION WITH FLASK

- Created a RESTful API in Python's Flask, leveraging Hugging Face Transformers for sentiment analysis.

Technologies: *Python, Flask framework, Hugging Face pre-trained model, HTML5, CSS3*

EDUCATION

B.Sc. IN COMPUTER SCIENCE AND ENGINEERING | SOUTHEAST UNIVERSITY (2019 – 2024)

TECHNICAL SKILLS

- | | |
|-------------------------------|--------------------|
| • Algorithm / Data Structures | • HTML5 |
| • OOP | • CSS3 |
| • Python | • MySQL |
| • C/C++ | • Flask Framework |
| • Git Version Control | • Django Framework |

PROGRAMMING SKILLS

Participation at on-site programming contests (ICPC Dhaka Regional Prelims, Intra university programming contests) and online contest held by Codeforces. Solved 500+ problems on various online judges. **Online judge profiles** : stopstalk.com/user/profile/no_success
